**Subject:** information

Hi [REDACTED]

I hope the following is helpful info for internal comms (taken largely from the press release sent yesterday):

- The Science Museum re-opens to the public on 19 May with a new exhibition, *Our Future Planet*
- *Our Future Planet* will offer visitors a first look at the cutting-edge technologies and nature-based solutions being developed to remove carbon dioxide from the atmosphere, to help mitigate the worst impacts of climate change
- Objects on display will include the first prototype mechanical tree that absorbs carbon dioxide from the atmosphere – Klaus Lackner’s Mechanical Tree – on display in the UK for the first time
- Experts featured throughout the exhibition include leading ecologists studying ancient forests, engineers at Arizona State University who developed the earliest versions of carbon capture machines, and chemists at C-Capture, who are working to remove carbon dioxide from emissions at the largest power plant in the UK
- *Our Future Planet* will be free and open Wednesday – Sunday from 10.00 until 18.00. During school holidays the museum is open seven days a week.
- *Our Future Planet* will form part of the Science Museum Group’s climate focused public programme. This includes Manchester Science Festival run by the Science and Industry Museum, Bradford Science Festival run by the National Science and Media Museum and the [Climate Talks](#) event series at the Science Museum which has seen 20,000 free tickets booked for online panel discussions on a host of climate-themed topics. Building on its Sustainability Policy, published a year out from COP26, the Science Museum Group also announced an ambitious target to achieve Net Zero by 2033

When we re-open, Shell employees will be able to:

- visit [Wonderlab](#) [REDACTED] [REDACTED] [REDACTED]  
[REDACTED]  
[REDACTED]
- book Wonderlab tickets [REDACTED] [REDACTED] [REDACTED]  
[REDACTED]  
[REDACTED]
- book [REDACTED] [IMAX](#) tickets, [REDACTED] [REDACTED] [REDACTED]  
[REDACTED] The IMAX has just been re-furbished and is looking fantastic.
- book [REDACTED] for paid exhibitions, [REDACTED] [REDACTED] [REDACTED]  
[REDACTED]
- obtain a [REDACTED] [REDACTED] on purchases in the Science Museum store (both in store, and online).

All tickets need to be booked online, using those codes at the checkout. If [REDACTED]  
[REDACTED]  
[REDACTED]  
[REDACTED] Also, it is worth noting that we will keep our [website](#) up to date with guidance on what to do when you visit, health & safety protocols etc (plus we will email visitors in advance) – so I would advise employees to always check the website before visiting. And, even if they're not using any of the above tickets, visitors will still need to BOOK a free, timed museum entry ticket, to gain access to the Museum (to align with COVID-19 protocol).

I hope that's helpful. Please don't hesitate to get in touch if you have any questions.

Best wishes

Hello

Following feedback on the logo, please find attached a revised version of the funder acknowledgement panel for Our Future Planet exhibition at the Science Museum. It includes the black logo (no white detail).

I would be most grateful for approval for use of the brand, as soon as possible as we are facing a tight print deadline.

Many thanks!

Best wishes,

[REDACTED]

[REDACTED]

**Attachments:** [20050 EXH - Our Future Planet Acknowledgments panel v3 Draft.pdf](#)  
[Scale.png](#)  
[20124 DEV - Our Future Planet Funder Funder Lock Up v3 \(003\).pdf](#)  
[Our Future Planet entrance.jpg](#)

---

Dear [REDACTED] and [REDACTED]

Please find attached several documents relating to the funder acknowledgement panel in the exhibition:

1. The acknowledgement panel
2. An image which shows relative scale
3. A photo of where the panel will be in the exhibition (which is in the middle of install as we speak)
4. A new funder lockup document

Please could you check the panel, and the new funder lock up document, and ensure that the brand team is happy with use of the logo. The funder lockup has changed slightly as there was a mistake with UKRI's designation in the original one (that was circulated before Christmas).

Please note that the acknowledgement panel will be light green in colour, so we have used the black version of the pecten. There will be no additional graphics in the vicinity of the panel, which is positioned at the entrance to the exhibition.

If you have any queries, please do let me know.

With best wishes,

[REDACTED]

[REDACTED]

---

**CAUTION:** This is an external email. Please do not click on links or attachments unless you are expecting them and are confident you recognise the sender.

Hi [REDACTED] please see our text below:

By providing energy to sustain people's lives over 125 years, Shell has become one of the world's leading companies. We have done so by evolving to meet the needs of our customers: from kerosene, to oil, to natural gas and, increasingly, low-carbon biofuels and renewable energies such as wind and solar power. We have a target to become a net zero emissions energy business by 2050, in step with society. Carbon Capture and Storage (CCS) is essential for society to reach the goals of the Paris Agreement and Shell seeks to have access to an additional 25 million tonnes a year of CCS capacity by 2035.

Best wishes,

Dear [REDACTED]

I hope this finds you well.

### **Consent Letter**

Our Brand Consent team have approved the use of Shell Trademark. I have attached the Consent letter which needs to be signed. This can either be signed via DocuSign or printing and scanning a coloured copy. To use DocuSign, we would require the name, surname and email address of the signatory.

If you'll prefer to print and scan a coloured copy of the letter, please note this will need to be sent to [REDACTED]@shell.com.

### **Guidelines for using Shell Pecten**

Please see below the following guidelines for using the Shell Pecten and the attached Zip files:

Please note our Brand team will need to see the final materials where the Pecten is used on for sign off.

**Signing Contract**

Regarding the signing of contract, this will be done next week.

Should you have any question, please do not hesitate to contact me.

Kind regards,

[Redacted signature]

Thanks Ian. I completely understand your situation and find myself needing to do the same prioritisations this year. Who would have thought that was where we would be when we last talked!

I would be very happy to do such an event with key stakeholders when the time is right for you and the museum.

Best,

[REDACTED]

**Subject:** FW: Shell's Powering Progress Strategy

Think Secure. This email is from an external source.

Dear [REDACTED]

Thank you for your email setting out Shell's Powering Progress Strategy. It is a clear and thoughtful strategy and I am sure will create a strong pathway towards the goal of net zero. The combined effort of the energy sector, and governments globally, is encouraging. I was also delighted to see that Shell scored so highly in the Transition Pathway Initiative's latest energy report. As you know, we are the first cultural sector partner to adopt this tool as part of our due diligence process.

Many thanks for your kind invitation to join you and [REDACTED] to hear more about your plans, however I am afraid that, on this occasion, I will have to politely decline. As you can imagine, the ongoing global situation means that increasingly more of my time is taken up by conversations with DCMS and Treasury about how to re-invigorate the cultural sector when we are allowed to re-open. As a result, I am having to squeeze rather more hours into the day than is feasible.

Despite the pandemic, work continues apace to install the *Our Future Planet* exhibition, and I look forward to being able to welcome you to the Museum sometime this year to

thank you in person for Shell's ongoing support of the Science Museum Group. Your support is now more important than ever, and I am very grateful to you for enabling us to continue our important work.

Can I end with one idea for you? Might you consider doing a special event for a select group of our stakeholders once the exhibition has opened? There are a lot of [REDACTED] we work with who would love to know more about your plans.....

Yours,

Ian

**SIR IAN BLATCHFORD**  
**DIRECTOR & CHIEF EXECUTIVE, SCIENCE MUSEUM GROUP**

---

Dear Ian,

I hope you are continuing to keep well and stay safe during these ongoing difficult times. I am very excited about the forthcoming CCS/NBS exhibition at the Science Museum. It will play an important part in explaining the critical role these carbon sinks must play to achieve net zero.

On that note, you may have seen media coverage of Shell's strategy update so I thought it might be helpful if I provided a few highlights for you.

Our strategy is called Powering Progress. We called it that because "powering progress" is how we see Shell's role in society. It is a strategy based on a set of ambitious but achievable goals: achieving net-zero emissions, powering lives, delivering shareholder value and respecting nature. You can find out more about what each of these goals means for Shell [here](#).

The sorts of actions we aim to take to achieve net-zero emissions include:

1. A new set of targets to **reduce our net carbon intensity**: 6-8% by 2023, 20% by 2030, 45% by 2035 and 100% by 2050, using a baseline of 2016;
2. In the near term, invest \$2-3 billion annually in **renewables and energy solutions**. We expect this level of spending to rise through the decade so that we could be providing enough renewable electricity for 50 million households by 2030;

3. Grow our **global electric vehicle network** from more than 60,000 charge points today to around 500,000 by 2025;
4. Access an additional 25 million tonnes a year of carbon, **capture and storage (CCS)** capacity by 2035;
5. Build Shell's leading position in **hydrogen** by developing integrated hydrogen hubs to serve industry and heavy-duty transport, aiming to achieve double-digit share of global clean hydrogen sales;
6. Use **nature-based solutions**, in line with the philosophy of avoid, reduce and only then mitigate, to offset emissions of around 120 million tonnes a year by 2030;
7. By 2030, we will **end routine flaring of gas** from the assets we operate.

You can read more detail [here](#), but the most important thing you should know is that change is coming to Shell. That change will be different in each of the three pillars of our business: Growth, Transition and Upstream.

In Growth there will be more clean power, more marketing and more innovation: from hydrogen to biofuels to products which simplify the energy system for our customers. In Transition, which includes Integrated Gas and Chemicals and Products, we are bringing greater flexibility into the assets and infrastructure we build our future on. And in Upstream, our business which explores for and produces oil and gas, we will carefully manage what we have. We will do so to provide value for shareholders, vital energy supplies for the world and to fund the transformation of our portfolio.

Powering Progress sets out our strategy to accelerate change in Shell, so we become a net-zero emissions business, and that we do so both purposefully and profitably.

I'm keen to hear your reactions to our strategy update. I was wondering if I could invite you to join an intimate virtual discussion where you can share your thoughts, and myself and [REDACTED], can attempt to answer any questions you may have and to provide an illustration of what this means for Shell in the UK. If that would be of interest, please let [REDACTED], copied, know dates that would suit you after 5<sup>th</sup> March.

Yours sincerely,

[REDACTED]

Hello

Following feedback on the logo, please find attached a revised version of the funder acknowledgement panel for Our Future Planet exhibition at the Science Museum. It includes the black logo (no white detail).

I would be most grateful for approval for use of the brand, as soon as possible as we are facing a tight print deadline.

Many thanks!

Best wishes,

Hi [REDACTED]

No. This artwork will be used on all the exhibition marketing. So, for example, it will be used on posters, invitations, ads, on the exhibition donor board. Anywhere where we would usually acknowledge the support of our funders. The hoardings are just the first item to be produced.

Best wishes

**Think Secure. This email is from an external source.**

Hi [REDACTED]

Please find attached the revised artwork for the Funder lockup, with the pecten, as advised. There are various formats, and also a version which doesn't include the Associate Funders (this would be used in an instance where we are acknowledging Major funders only, due to the nature and value of the asset).

If, by any chance, you're able to seek approval for this by COP today, it will be able to go to print with the Pecten included.

With best wishes,

[REDACTED]

Hi [REDACTED]  
Many thanks for this. Some further discussion has taken place since the version I sent you. Please could we use the following:

Shell is a global group of energy and petrochemical companies that aims to meet the world's growing need for more and cleaner energy solutions in ways that are economically, environmentally and socially responsible. We have a target to become a net zero emissions energy business by 2050, in step with society and are working to cut the emissions from our own operations, as well as reducing greenhouse gas emissions per unit of energy that our customers use. But there is no single solution. Carbon Capture and Storage (CCS) is essential for society to reach the goals of the Paris Agreement and Shell seeks to have access to an additional 25 million tonnes a year of CCS capacity by 2035.

Nature-based solutions can also make a big contribution and we are working with projects around the world that help reduce CO2 emissions, while improving the lives of local communities and protecting biodiversity. We only work with nature-based projects that are certified under credible, high-quality and independent carbon credit standards.

Best wishes,  
[REDACTED]

Dear [REDACTED]

Just responding to your due diligence question.

The Science Museum Group operates at arm's length from central Government [REDACTED]. We are not owned by a government official. However, our sponsoring department is DCMS & we have various reporting obligations to them, which means that they have visibility of our strategic direction, financial information etc.

This description is taken from our Annual Report and Accounts:

The Board of Trustees of the Science Museum is the corporate body of the Science Museum Group and was established under the National Heritage Act 1983. Until 1984, the Group was managed directly by Government when it ceased to operate as part of a Government department. It now has the status of a non-departmental public body (NDPB), operating within the public sector but at arm's length from its sponsor department, the Department for Digital, Culture, Media & Sport (DCMS). These accounts fulfil the requirements of the 1983 Act and the Museums and Galleries Act 1992. The Science Museum Group is an exempt charity under Schedule 3 of the Charities Act 2011, with DCMS acting as its principal regulator for charity law

purposes, and is recognised as charitable by HM Revenue & Customs. The Group has a wholly owned subsidiary trading company, SCMG Enterprises Ltd (company registration no. 02196149), set up in 1988 and operating across all the Group's museums.

Hope that helps.

Best wishes

Hi [REDACTED]

Good to e-meet you.

As discussed, please see below information for the contracts:

### **Entity to be used**

Having checked with our finance team about the entity to use for the contract, I can confirm we will need it to be Shell International Limited.

Regarding who the contract should be addressed to, please use:

[REDACTED]

[REDACTED]

### **Due Diligence**

As part of our due diligence, please can you confirm the following:

-----

[REDACTED]

- o [REDACTED]

[REDACTED]

- o [REDACTED]

[REDACTED]

Please can you send me the above information as soon as possible?

**Invoicing**

[REDACTED]

Below is the information needed for invoicing:

Please include word **\*sponsorship\***

**Shell Contact name** – [REDACTED]

**Comment:** [REDACTED]

**Addressed to the correct Shell Entity**

Shell International Limited  
2 York Road, Waterloo  
London  
SE1 7NA  
United Kingdom

Please send the invoice to [REDACTED]@shell.com and copy in myself and my colleague [REDACTED]  
[REDACTED]@shell.com.

If unable to send in the invoice by the date highlighted, please do let me know.

Also, we may need to contact you regarding completing a Supplier Information Sheet as we are reviewing your information on our system.

If you have any question, please do not hesitate to contact me.

Kind regards,

[REDACTED]

[REDACTED]

Hi All

As you know we are a joint sponsor of the Our Future Planet: can carbon capture help us fight climate change? exhibition, at the Science Museum from May 2021 – Oct 2022.

We have the opportunity to hear from the team who curated the content and who have full editorial control about all aspects of the exhibition.

Kind regards

[redacted]

Dear [REDACTED]

[REDACTED]

Confidentially, we also have some commitment from UKRI towards the exhibition which is being finalised, but I will let you know how conversations progress with both parties

[REDACTED]

In terms of our partnership, additional information has now been shared on the Carbon Capture exhibition and Climate Talks event series with [REDACTED] but please don't hesitate to call me if you would like to discuss directly.

Yours,

Ian

**SIR IAN BLATCHFORD**  
**DIRECTOR & CHIEF EXECUTIVE, SCIENCE MUSEUM GROUP**

**Subject:** Science Museum - Carbon Capture exhibition and Climate Talks Series

Think Secure. This email is from an external source.

Dear [redacted]

I hope you are well and continuing to navigate these challenging times. Since we last spoke in the summer, I have been pleased to see the importance of sustainable action and building back better receiving greater profile. There appears to be a renewed vigour, and increasingly evident collaboration, to move towards net zero status even in the wake of the pandemic.

As you know from our conversation, sustainability is a central strand of our work, and our contemporary science team has been working hard to develop our new exhibition about CCS opening on 31 March 2021. Our Development team has now spoken to your team about the possibility of Shell's support for the exhibition so that we may continue our partnership through an engaging and entirely relevant topic.

We are also developing an exciting and high-profile series of climate talks to accompany the exhibition, which we expect to attract a significant amount of attention and engage a global audience of listeners and influential speakers. I have attached more information as this event series has taken

shape since our last meeting [REDACTED]  
[REDACTED]

In summary, I believe the exhibition, and events series, will create an important source of impartial, science based information for our visitors and online community at a time when public understanding of our options to mitigate climate change is essential. I appreciate that it remains a challenging period for all, but given the relevance of these projects and our shared aims, I hope that working with the Science Museum Group still resonates as a positive opportunity for Shell.

Yours,

Ian

**SIR IAN BLATCHFORD**
